Project Concept

- ReFix Mobile is an environmentally-friendly mobile phone repair and refurbishment firm that extends devices' lifecycle and reduces e-waste.
- I chose this idea because phone changes are routine and cause environmental pollution.
- I will do research on competitors, customer needs and e-waste.
- I will produce a Business Model Canvas at the end of the day.
- One of the factors that will guarantee success is research and feedback that will be provided by tutors, friends and potential customers.

Introduction

ReFix Mobile offers cost-effective care and upkeep of smartphones as well as refurbishment. Customers should anticipate professional repairs, upgraded devices and environmentally friendly e-waste handling. (Matikainen, 2026).

Personal Skills

- Develop Adobe/design skills through logo creation.
- Improve digital and website design skills.
- Develop research, financial planning and communication skills.

Business Goals

- Create a trusted sustainable repair business.
- Attract customers through affordable, reliable services and social media promotion.

Mission

- Extend smartphone lifespans.
- Reduce e-waste through repair and reuse.
- Promote environmentally responsible practices.

Income

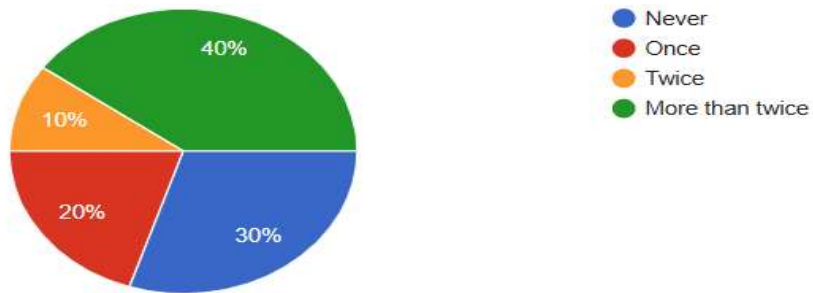

- Smartphone repair fees.
 - Refurbished phone sales.
 - Accessories and replacement-part services.
- 

Basic Research

How often have you experienced damage to your mobile phone?

 Copy chart

10 responses

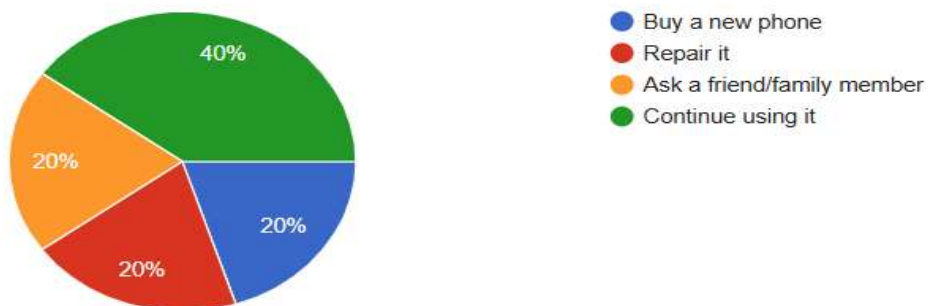

The results show 40% experienced phone damage more than twice, while 30% never experienced damage, 20% once, and 10% twice.

What would you most likely do if your phone became damaged?

 Copy chart

10 responses

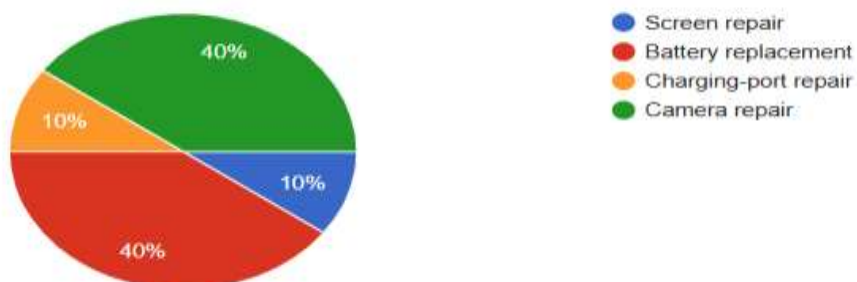

The results show 40% would continue using damaged phones, while 20% would buy new phones, repair, or ask friends/family, respectively.

Which repair service would you be most interested in?

 Copy chart

10 responses

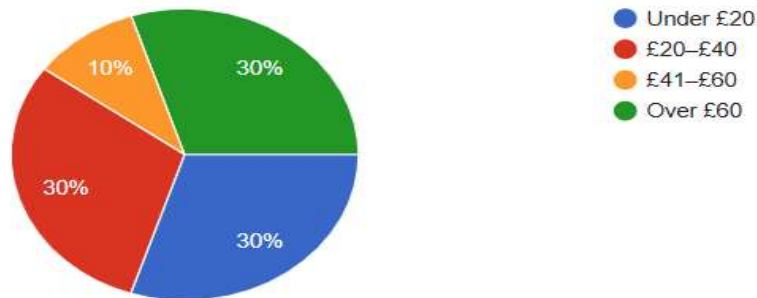

The results show 40% prefer battery replacement and 40% camera repair, while 10% prefer screen and charging-port repairs, respectively.

Continue...

What price would you consider reasonable for a common phone repair?

 [Copy chart](#)

10 responses

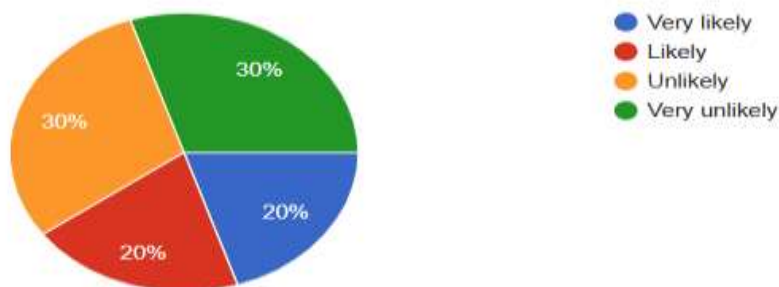

The results show 30% consider under £20 reasonable, 30% prefer £20–£40, 10% £41–£60, and 30% over £60.

How likely would you be to use an affordable repair service that helps reduce e-waste?

 [Copy chart](#)

10 responses

The results show 20% are very likely and 20% likely to use the service, while 30% are unlikely and 30% very unlikely.

The basic research shows a clear need for affordable mobile phone repair services, while the findings will help ReFix Mobile develop suitable services and customer-friendly pricing.

Market Research

(Source: Gophr, 2026)

(Source: Ismash, 2026)

Continue...

Competitor: iSmash – iSmash is a smartphone repair service provider; they repair screen, battery, camera and charging related services (ismash, 2026). It charges via devices and repair; its stores and mail-in service in the UK are accessible to its customers. It advertises its services via its site, student discounts and offers.

ReFix Mobile's 4Ps:

- **Product:** ReFix Mobile will offer the following repair products: screen, battery, and charging-port repair, with the emphasis placed on reliable and environmentally friendly solutions.
 - **Price:** Prices will be affordable and student friendly.
 - **Place:** Services will operate through a local repair point with collection and delivery options.
 - **Promotion:** ReFix Mobile will utilise Instagram, TikTok, its website, student specials and referral offers (Raharja, 2025). Competitor research will therefore enable ReFix Mobile to come up with competitive pricing for services and ensure access is convenient and targeted promotions are made whilst having a focus on sustainability.
- 

Sustainability

- The key in ReFix Mobile is to increase the lifetime of the smartphones by repairing and refurbishing – to reduce electronic waste (e-waste) in this sense (Matikainen, 2026).
- The business will reduce the unnecessary replacement of phones, the re-use of parts and the proper management of inert components, minimising waste.
- The business will do this with a reduction of the unnecessary replacement of phones, by re-use of appropriate parts and the proper management of inert components, minimising waste.
- This will reduce unnecessary wastage and persuade customers to make more environmentally friendly decisions.

UN SDG 12 – Responsible Consumption and Production: ReFix Mobile will promote responsible consumption by motivating customers to repair and reuse phones instead of disposing of them.

UN SDG 13 – Climate Action: ReFix Mobile will contribute to lowering the environmental costs related to smartphone use by increasing the lifespan of devices, decreasing the need to replace and discard them unnecessarily

Brand Development

Team Development

Team development in ReFix Mobile will consist of two all-important roles. Founder/Business Manager will plan and handle finances and customer service, whereas the Technical Repair Specialist will perform diagnostics and repairs and ensure quality control. Both positions would be essential to have successful business administration and quality technical support.

SWOT Analysis

Strengths	Weaknesses
• Sustainable business concept • Growing demand for smartphone repairs • Affordable alternative to replacement	• High equipment costs • Dependence on skilled technicians
Opportunities	Threats
• Growing student market • Increasing demand for refurbished devices • Potential for expansion across cities	• Established competitors • Rapidly changing smartphone technology • Availability of cheap replacement devices

Global Presence

ReFix Mobile will expand from **London** → **Manchester** → **Birmingham** → **European cities**, targeting areas with large student populations and demand for affordable repairs.

Company Logo

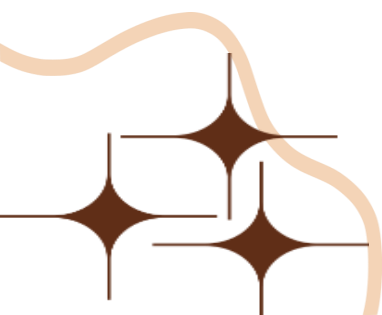

Source: (Self-generated, 2026)

The name communicates repair and reliability. The phone-and-recycle symbol represents repair and sustainability, while green reflects environmental responsibility.

Financial Development

- **Expected cash inflow:** ReFix Mobile will be able to make money primarily by means of smartphone repair and refurbishment (Peddinti, 2026). It is projected that sales will grow to over 8,000 in Year 1 and up to 20,000 in Year 4 as the business acquires customers.
 - **Expected cash outflow:** Principal expenses to be expended include replacement parts and materials, packaging, web, marketing, delivery/travel and other miscellaneous operating expenses.
 - **Estimated profit or loss:** The project estimates a positive net cash flow in every year, starting with the amount of £4,000 in Year 1, and is projected to rise up to £8,000 in Year 4, which suggests a rise in the business and financial stability.
-

Table 1: ReFix Mobile Cash Flow Forecast (Year 1–Year 4)

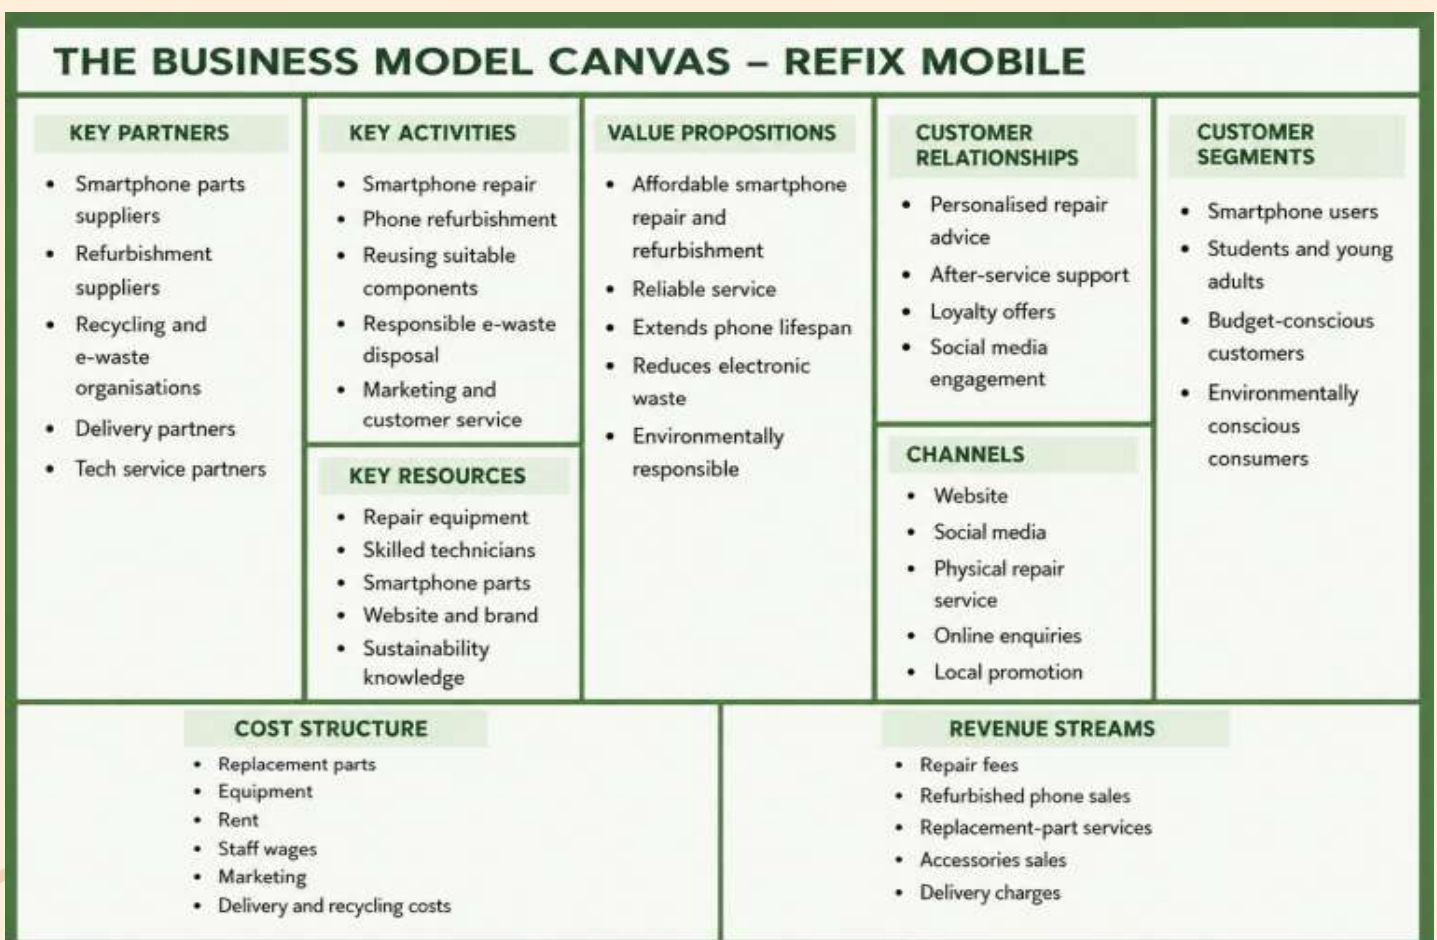

£	Opening Balance	Year 1	Year 2	Year 3	Year 4
Opening Balance	£0	£0	£4,000	£9,000	£15,500
EXPECTED CASH INFLOW					
Sales income		£8,000	£12,000	£16,000	£20,000
Other income or grant		£1,000	£0	£0	£0
Total Income		£9,000	£12,000	£16,000	£20,000
EXPECTED CASH OUTFLOW					
Materials or production		£2,000	£3,000	£4,000	£5,000
Packaging		£500	£700	£900	£1,100
Website costs		£300	£300	£400	£500
Marketing and promotion		£700	£1,000	£1,300	£1,600
Delivery or travel		£500	£700	£900	£1,100
Other costs		£1,000	£1,300	£2,000	£2,700
Total Cost		£5,000	£7,000	£9,500	£12,000
ESTIMATED PROFIT OR LOSS					
Net cash flow		£4,000	£5,000	£6,500	£8,000
Closing balance		£4,000	£9,000	£15,500	£23,500

Final Outcome:

Business Model Canvas

- The final outcome will be a Business Model Canvas showing how ReFix Mobile will operate as a sustainable smartphone repair and refurbishment business.
- It will identify key partners, customers, channels, resources, activities, value proposition, customer relationships, costs and revenue streams.
- The target audience will include students, young adults, budget-conscious customers and environmentally conscious smartphone users.
- The Canvas shows how ReFix Mobile creates value, earns income and reduces e-waste through its sustainable business model.

Personal Reflection

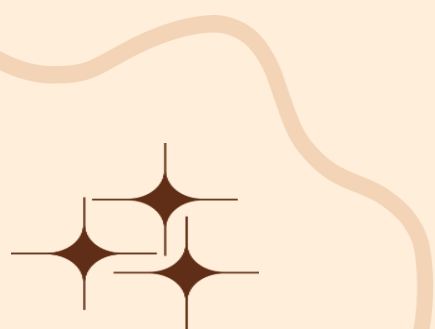

- My strengths during this project were research, development of ideas and linking the business concept to sustainability.
- I have been working on ReFix Mobile because, during my research on the problem of e-waste,
- I understood the necessity to create a solution to this environmentally harmful issue and the significance of prolonging the life of a smartphone. But I struggled in the area of financial planning and working on the logo.
- I combated these challenges by going through examples, scrutinising competitors and perfecting my thoughts.
- In my study, I was able to develop solutions for sustainable design. Given more time, I would research some more design methods, refine the concept of the site and test the site with prospective customers to get more feedback.

Appendix

Questionnaire

Q1. How often have you experienced damage to your mobile phone?

- A. Never
- B. Once
- C. Twice
- D. More than twice

Q2. What would you most likely do if your phone became damaged?

- A. Buy a new phone
- B. Repair it
- C. Ask a friend/family member
- D. Continue using it

Q3. Which repair service would you be most interested in?

- A. Screen repair
- B. Battery replacement
- C. Charging-port repair
- D. Camera repair

Q4. What price would you consider reasonable for a common phone repair?

- A. Under £20
- B. £20–£40
- C. £41–£60
- D. Over £60

Q5. How likely would you be to use an affordable repair service that helps reduce e-waste?

- A. Very likely
- B. Likely
- C. Unlikely
- D. Very unlikely

THANK YOU
