Profile

PHP Developer with 2+ years of experience building scalable web applications using Laravel, CakePHP, and CodeIgniter. Expertise in backend development, REST APIs, and database management, with experience developing complex systems including order management platforms, role-based dashboards, and real-time chat features.

Strong in performance optimization, scalable data handling, and workflow automation, with a focus on clean, maintainable code and user-centric solutions.

WORK EXPERIENCE

Php Developer , Nextedge Digital Udaipur

Jun 2024 - Present

- Designed and developed a comprehensive Inventory Management System to streamline lead handling, order processing, and communication workflows, significantly reducing manual effort and errors.
- Built a multi-module platform including Order Tracker, Follow-up Tracker, and Enquiry Management to improve operational efficiency.
- Developed 5+ role-based dashboards for Business Development (BD), Writing Team, Team Leaders (TL), Super TL, and Support Team to enhance visibility and workflow management.
- Implemented a weekly task tracking system to monitor team performance and ensure timely delivery across departments.
- Created a real-time chat system with notifications for messages and feedback, improving internal communication and collaboration.
- Designed a dynamic mailer system integrated with multiple websites for automated communication and lead engagement.
- Built analytics and reporting features, including yearly lead and order reports with interactive sales charts for better decision-making.
- Delivered a Writer Payment Management solution integrated with an automated Invoice Generator to streamline billing processes.
- Implemented a centralized notification system for chats, feedback, and operational updates to improve responsiveness.
- Built an SSO (Single Sign-On) Portal to integrate five websites and payment gateways into one secure, dynamic platform, enhancing user convenience and system security.
- Managed the development and maintenance of five web applications, ensuring robust performance and system stability.
- Integrated and managed a CRM system for the SEO team using CakePHP 3, improving task tracking and efficiently managing content across 5 websites.
- Adapted and integrated third-party software and components into existing PHP applications, efficiently resolving complex technical issues and ensuring smooth functionality.
- Built an HRM portal using CodeIgniter, delivering efficient workforce management solution.

- Worked as a Core PHP Developer, contributing to the design and development of a Learning Management System (LMS).
- Built Rest APIs in Core PHP for seamless data exchange and system integration.
- Constructed multiple dynamic websites in Core PHP, ensuring responsive design, scalability, and high performance.
- Crafted front-end features using HTML, CSS, JavaScript, jQuery, and Bootstrap to create responsive and user-friendly websites
